# Defender KA64

## Allrounder

The KA64 is the real all-rounder in the Defender collection. Strong, robust and impact proof, this box is perfect for heavy-duty requirements. Their construction makes these boxes ideal for transport of valuable loads, sensitive equipment and fragile components.

The boxes are made of high quality aluminium with strong base and lid sections. With their light weight, the boxes are easy to use because of their low weight and the comfortable handles. In terms of logistics, the KA64 boxes are also very practical; with their aluminium corner pieces, they are stackable and the dimensions have been optimized for pallet transport. The KA64 is available in various standard sizes; customized sizes are also possible, even in small quantities.

## Technical features

# KA64

### Features:

- Strong and stable construction
- Can be made to customized dimensions
- Stackable: KA64s with each other, with the KA74 and various other brands
- Riveted
